About Carol Nicholson, PhD, Certified Psychic Medium

Greetings student! My name is Carol Nicholson, and I'll be your guide throughout this clairvoyance training program. I have been a professional psychic, clairvoyant, and medium for over 30 years. During that time, I've done readings for countless individuals and have taught many diverse classes and programs. Some of my students have become professional psychics and mediums in their own right and are doing readings for the public successfully.

A Little Background History

As a young child, I saw spirits in my room at night, had vivid dreams and nightmares of events that seemed from previous time periods, and saw visions of events that actually came to pass.

With the memories of the supernatural events of in childhood still fresh in my mind, I started focused training for psychic development in my early 20s. By then, there was enough information out there to help me understand what was going on with me and how to start developing my abilities. Eventually, I started utilizing my psychic gifts in a professional way.

Imagine Spirit Universal Psychic Arts Institute was started in 2001. Although I'd been teaching many diverse intuitive classes for several years, Imagine Spirit online came about because of all the people who came to me with similar abilities as mine and wanted to know how to manage and use their abilities in a positive way. With help from my angels and guides, I launched Imagine Spirit and have been successfully teaching individuals how to become psychics and mediums in their own right.

If you're taking the home study for certification, please read the lessons thoroughly, faithfully do the exercises presented, and finish the quiz at the end of each lesson. The quizzes are highly useful for your certification process. And the good news is, you don't have to submit them. They're for your own retention of materials presented.

I hope you enjoy this course as much as I have enjoyed putting it together!

Warmest regards,

THE LIVE CLASS RECORDINGS:

When listening to the live class recordings, you may find that some of the topics in the written course are **not covered** in-depth in the class recordings. Therefore, some of the exercises will be done by the student on their own, as designated in the written material for each separate lesson. This does not mean you'll not have the opportunity to learn as much as the live class did. In fact, you will have an opportunity to learn even more if you faithfully practice the exercises that have been recorded for you.

In his book *The Illuminati Papers* (1997), regarding

ESP, Precognition, Prophecy, Clairvoyance, Distance Viewing,

Psychic Abilities, Psychokinesis, Out-of-Body Experience, Cosmic Consciousness, and the like,

author Robert Anton Wilson states he has found a single scientific explanation for all the weird

events that Parapsychologists have classified under all these conflicting labels.

He writes,

“All mystical brain functions are aspects of one phenomenon: a subatomic but universal intelligence system that receives, integrates, and transmits information at a level much deeper than the sensory appearances of what we call space, time, and separateness.”

Introduction

The purpose of this extensive program for psychic-clairvoyance training is 5-fold.

1. To learning most facets of the psychic arts with primary focus on clairvoyance development
2. To provide a spiritual foundation of self-discovery, healing, and growth.
3. To learn to work with higher entities using safe and time-honored methods.
4. To learn to psychically see energy fields, the chakra, and the aura to perform healing
5. To have the ability and confidence to perform psychic readings with Oracle cards for either personal or professional reasons.

What You Put into It

Developing clairvoyance takes time. Even though we all have this natural ability, in order to use it on demand and trust what you receive in terms of images and impressions experienced, it takes time. We all have busy lives, and I understand it can be difficult finding the time to practice the exercises and listen to class recordings. Just know that **WHAT YOU PUT INTO IT IS WHAT YOU WILL GET OUT OF IT**. In other words, taking the time to study your lessons and doing some practice each lesson is paramount. Please don't hurry through the program. Work through the lessons slowly and absorb all you can with each lesson presented. The consistency of practice will ensure the successful results you wish to achieve for acquiring confidence in using your skills and mastery of your craft.

Start a Journal to Record Your Experiences and Progress

One of the first things I ask students to do is to start a journal to document their experiences that seem above and beyond the norm. In the beginning of development and first opening up the psychic centers, it's quite common for unusual psychic events and vivid dreams to begin to occur. When something does occur that you know is outside of your everyday happenings, try to remember everything about it in great detail. What were you thinking before the event occurred? Were you in a neutral thinking state and not really focusing on anything in particular? Was it something that you don't normally experience? Then write down the date, everything that happened, and check the phase of the moon perhaps on a calendar. You don't have to write volumes of words; just write the facts and any feelings that accompanied the event. Then forget about it.

In addition, any time you work on a practice session or listen to an exercise, keeping a journal is an essential tool for development. You will find that, over time, you will begin to see a pattern emerge. This pattern should reveal to you how you perceive clairvoyantly and psychically! You will also be able to go back and read about past experiences if something similar happens later.

What Clairvoyance Is

Clairvoyance, as a term, has its origins from the French word *claire*, which translates to “clear”, and *voyance*, which translates to “seeing”. The entire meaning is “clear seeing”.

Here is what the *Merriam-Webster Dictionary* says:

1: the power or faculty of discerning objects not present to the senses

2: ability to perceive matters beyond the range of ordinary perception

Clairvoyance is the ability to perceive visual information through extrasensory means. What this means is that extrasensory information does not come through the normal channels of our senses. In a nutshell, clairvoyance is the mechanism for seeing—both psychically and intuitively—people, places, objects, and events not usually experienced with our physical senses of sight, seeing, hearing, or smell. For most people, clairvoyance is usually the most prominent of the psychic senses of clairaudience, clairsentience, claircognizance, clair empathy, and intuition—with clairsentience coming in at a close second.

Just What Is Clairvoyance?

Let’s start by clarifying some commonly held beliefs.

Myth

- Visions are literal and clear
- Most well-known of all the intuitive abilities
- Visions are always about predicting the future
- Clairvoyant and psychic mean the same thing

Reality

- Visions are often symbolic
- Least understood of all the intuitive abilities
- Visions could be of the past, present, or future
- Someone who is psychic may or may not be clairvoyant

If You're a Primary Clairvoyant...

You're someone who receives and processes intuitive information *visually*.

Clairvoyance can be very subtle or you may get a full-blown premonition of something that actually came about in the Third Eye area. Things that come into your mind might be a vivid color, a number, or even a symbol. It is important to know that the images are not always literal - they are often symbolic. For example, you might see the image of the Easter Bunny when thinking of a

friend and it might signify someone close to you is pregnant but hasn't told you yet. Up to now, you may or may not understand what these images initially mean. We'll be covering interpreting symbols later in the course.

What Is the Third Eye?

The Third Eye is a chakra center that is located on your forehead, between your eyebrows. When people have Third Eye visions, they see them in this area, which is known as the mind's eye. It's called this because you're seeing these visions within your mind where you see pictures when you're using your imagination.

Getting a Feel for Where Your Third Eye is Located

Just place one of your fingers gently on an area I just mentioned. Hold it there for a few moments. Apply a slight pressure. Feel an immediate relaxation take place. Your Third Eye is now activating.

Can I Open My Third Eye More?

Absolutely! The best way to increase your Third Eye second sight, or clairvoyant abilities, is by practicing visualization and meditation.

A Simple Demonstration for Directed Clairvoyance:

Close your eyes and mentally ask for a color to appear which relates to something going on in your life. Don't force it to happen, just notice any color that pops in. There is no need to interpret the color's meaning right now. Got one? *Voilà!* You're using directed clairvoyance!

If you're primarily a clairvoyant, you most likely have experienced certain things in your life such as realistic dreams, premonitions, seeing situations remotely, colors around people, and vivid snapshots of a scene or pictures that play like a movie.

Tendencies of a Primary Clairvoyant and the Downside:

- they tend to say "I see" ...
- see energy fields without being conscious of it
- are aware and have ability to see auric fields
- have ability to project a situation onto a Third Eye scene
- problem-solve by picturing
- like a lot of space and high windows
- are constantly looking around to assess situations

Primary clairvoyants need to work on:

Their initial resistance to change.

Demystifying Clairvoyance

Clairvoyance is a faculty we are all born with. Some people are aware of this fact and actively use their clairvoyance faculties in various ways. Others either may not be aware of this fact or are simply not interested in using it. All of us have some sort of vision or premonition experience at some point in our lives.

Cases of pronounced and amazing feats of clairvoyance have often been demonstrated by children. Since we are all born with this faculty, it's not surprising that children, who haven't yet been programmed to disregard such things, demonstrate abilities for seeing things that adults don't. On a practical level, we unconsciously use our clairvoyance every day to problem solve, to envision what a friend is doing, to see ourselves going to the store, imagining winning the lottery, seeing ourselves get that wonderful job, and the possibilities go on ad infinitum. Clairvoyance is something we humans have been making use of for thousands of years, and science is just catching up to the fact that this faculty really does exist and, more than that, that it's a natural part of who we are.

What's it like to have a vision?

Experiencing a vision can be a very subtle and you have to really take notice of it while other times the vision is so startling, it can rock your world. Some people describe it as watching moving pictures inside of their head in their minds eye. Other people may just see a still image. For me, I see things both ways depending on what I'm doing, or what type of reading I'm conducting.

Sometimes I see pictures in motion. Other times, I may just see images like a snapshot or a series of snapshot slides.

Do Third Eye Visions Always Foretell the Future?

Not necessarily. Many times, especially during readings, psychics will get pictures of events that are going on right now, in the present. They may even see things from the past that are affecting the present. Future visions are not totally out of the question though. One man I know reported getting psychic flash moments before seeing a traffic accident and felt he had been forewarned to slow down just prior to it happening.

Question: “Are clairvoyant visions just like what I see in the movies or on TV?”

Carol's answer: *Have you ever seen a movie where a psychic:*

- *is seeing intense and clear images of a future event?*
- *locates a missing person easily and instantaneously by following a vision?*
- *is talking to a spirit face to face as if it were a real person standing there?*

I've seen these programs too. This is Hollywood in action and events like the ones mentioned above usually don't occur that vividly. Often, an event is subtler than that, however, there are exceptions to this.

Here is a starter clairvoyance meditation to start opening the Third Eye:

Meditating with your Third Eye is an important key to success if you want to open the Third Eye. Try it right now...all you need is 5 - 10 minutes. The main factor in this exercise is *visualization*. We'll be covering meditation more in depth in later lessons as well as many more exercises.

If you're a visual person (meaning when I say picture a tree, you can see a tree in your mind), this psychic development exercise will help strengthen that ability.

If you struggle with seeing things in your mind's eye, following these steps will help. It just takes a little practice and patience.

1. Get comfortable and start by choosing a quiet place to sit and relax for a few minutes. Some people say that clairvoyance meditation should be done sitting in an upright position, but this is really not necessary. Just sit or lay however you're the most comfortable.
2. Close your eyes and take some deep breaths. Breathe deeply in a slow rhythmic fashion. Breathe in through your nose and out through your mouth. Many people make the mistake of breathing too shallow from the chest when they begin. If you're new to meditating, I suggest that you place your hand on your stomach. When you breathe in, feel your stomach expand. This will ensure nice, deep breaths. (You will be learning more on how to breathe correctly later in this course.)
3. Begin the visualization by seeing a symbol. I'm including an image of the famous Zener Cards (pictured above). Choose one of the symbols you like. You can make it any color or size.
4. Now, the fun begins! In your mind, with your eyes closed, visualize the symbol you have chosen. It doesn't matter the size or color of the symbol, just focus on seeing it in your mind. You might start to feel a tingling sensation on your forehead, in between your eyebrows. This is where your Third Eye chakra is located and this sensation is totally normal. If you don't feel anything, that's okay too. You may once you have practiced a bit.
